About me

Front-end Developer and Designer specialist in create technology solutions with Web standards.
I study English, Spanish, French and speak Portuguese.

Always developing solutions with technologies: CSS, HTML, JavaScript, Webpack, Gulp.js, Grunt.js, ParcelJS, Cypress.io, jQuery, Quasar.js, Nuxt.js, Typescript, ES6, React.js, React Native and the Framework's Angular, Vue.js, and Svelte.js

I use Git as code versioner and Github, Bitbucket, Gitlab,
The Stylus.js preprocessor for working with CSS, I also work with Less and Sass

Always looking to develop and write semantic HTML with the latest version
Using maximum that language offers, I also use Pug.js a template engine
My focus is improving information with performance, a lot of quality, and innovation

Creating End-to-End tests with Cypress.io, generating positive results in projects
Doing research and usability tests, improving the experience with CSS animations.

I develop my artistic skills inside and outside technology in real world.
Writing poems and also created draw arts (urban art).

Hobby

Art

Development Interfaces Web

Helper peoples with Technology

Academic education

🎓 Senac Brazil

Professional course, Web Developer

Activities: Developed a portfolio using CSS, HTML, JavaScript, PHP and MySQL.

📅 February in 2012 to December in 2013

🎓 Alura

Front-end, React, Vue.js, TypeScript, Angular, JavaScript

Activities: Front-end Formation, React Formation, Typescript Developer Career, Vue.js Developer Career.

📅 December in 2018 ✅ Studying

E.E.Jornalista Francisco Mesquita

Complete High School

Reference: [jornalista-francisco-mesquita.web.app](#)

 February in 2010 to December in 2013

Experience

Interfood

Work: Front-end

Activities: Working on web and mobile development.

React, React Native, JavaScript, Unit Testing with Jest.

Design implementation and UX improvements.

 November in 2022  Current work

Matera

Work: Front-end

Activities: Work with Javascript, HTML, CSS and a lot frameworks in my stack this React, Angular, i18n, CryptoJS, Progressive Web App, Work with Javascript, HTML, CSS and a lot frameworks and library in my stack.

 February in 2021 to July in 2022

Resource IT Solutions

Work: Front-end

Activities: Technology consultancy I worked with the following clients.

Client Bank Santander

Refactored and automated the minified build of an internal forms application, using Gulp.js and the best web practices.

I rewrote an application of event that was written with zpeto.js for Angular 5 with web components and a service layer consulting a json-server with fixed values.

Technologies: CSS, HTML, JavaScript, Angular 5, NodeJS, Gulp.js, PWA, Atom, Git.

Client Fidelity

Implemented Gulp.js to minify and organize the build of an Angular.js application.

Updated Bootstrap and refactoring Angular.js components.

Client Bank Votorantim

Development components and sustainability of a SPA written in Angular.js

I did refactorings in CSS to SASS, animations written CSS3, introducing PWA and SVG

Good accessibility and best practices with keyboard navigation with semantic HTML5

An interface with responsive and adaptive design in various screen resolutions.

 June in 2017 to April in 2018

Átomo Comunicação (Atom communication)

Work: Front-end

Activities: Create and managed Email marketing and Landing Pages.

Improved the workflow using tools like Gulp.js to automate front-end processes.

Developed a script in ShellScript to automate and generate a lot emails in batch.

Using just a configuration file with the values in variables of the products,

With changed according new values and new email marketing.

The client I worked the most was Smiles from the Gol airline.

In the CowParade promotion I made a cow that floated,

and fly around the site when on mouse over it swayed funny.

I used only JavaScript and CSS to make this animation.

During the Mother's Day period I developed a heart that also floated and fly

around the site when on mouse over with pulsed and emitted a heart sound.

I used in this solution with JavaScript, CSS and SVG.

Technologies: HTML5, CSS3, JavaScript, jQuery, Babel, Nodejs, Pug,

Sass, Stylus, ShellScript, Photoshop, Gulp.js, Git, Atom, Terminal, macOS, Liferay.

 **March in 2017 to May in 2017**

IBM

Work: Front-end

Activities: Worked in the coding and maintenance of Layouts, standardizing code and management.

Bringing innovations with development improvements together with the Avon client in structuring

and implementing friendly themes with WebShepere Commerce.

Client Avon Cosmetics

Maintained the development and management of three simultaneous themes

for the resellers, with several variations in the layout with Sass working the CSS.

Also improving the semantics of HTML along with responsive design,

elements adaptive and looking for better performance on the interface as the screen.

Developed solutions for the project using the standards of the JavaScript framework DojoToolkit.js

Advanced tools I create a zoom system for the project on page product totally friendly with mobile and tablet.

A new and personalized experience in the Project WebShepere Commerce.

 **February in 2015 to March in 2016**

Intima Store

Work: Web Designer

Activities: Development and support of the virtual store, Blog, Email Marketing.

Image processing, banners and promotional landing pages.
